|                                                           |                              |
|-----------------------------------------------------------|------------------------------|
| <b>DevOps Trainee – Gradiious Technologies, Hyderabad</b> | <b>May 2023 – April 2024</b> |
|-----------------------------------------------------------|------------------------------|

- Gained hands-on experience in **cloud infrastructure, automation, orchestration**, and **CI/CD** by utilizing a comprehensive set of technologies, including **AWS, Jenkins (CI/CD), Kubernetes, Docker, Linux, Terraform, Git**, and **Ansible**.
- Demonstrated proficiency in deploying and managing scalable, resilient environments to streamline development workflows, optimize resource allocation, and ensure seamless, continuous integration and deployment processes.

### TECHNICAL SKILLS AND TOOLS

---

- **Cloud Platforms:** AWS
- **Containerization & Orchestration:** Docker, Kubernetes
- **CI/CD Tools:** Jenkins
- **Infrastructure as Code (IaC):** Terraform, AWS CloudFormation
- **Monitoring & Logging:** Prometheus, Grafana, Loki, Amazon CloudWatch, AWS CloudTrail
- **Networking:** Understanding of TCP/IP, DNS, HTTP/HTTPS
- **Database Management:** SQL
- **Version Control :** Git
- **Scripting:** Shell
- **Configuration Management:** Ansible
- **Web Servers and tools:** Nginx, Apache, SonarQube

## PROJECTS

---

### 1. Deploying a 3 Tier Architecture On AWS

- Designed scalable **Amazon EC2** solutions incorporating **Load Balancers** and **Auto Scaling** to maximize performance.
- Built a React.js frontend hosted on an **Nginx server**, seamlessly integrated with a **MySQL** database to enhance application functionality.

### 2. Building a 3 Tier CI/CD pipeline in Jenkins

- Configured a **3-tier CI/CD pipeline** using **Jenkins**, orchestrating ReactJS frontend, NodeJS backend, and MySQL database deployments, with **SonarQube** integration for continuous testing and quality assurance.

### 3. Hosting a Static website in AWS

- Set up a static website on **AWS S3** and utilized **CloudFront** to enable **global content distribution**, achieving enhanced delivery speed, **reliable availability**, outstanding performance, and **lower latency** across multiple geographic areas.
- Established end-to-end security with **SSL/TLS encryption** using **AWS Certificate Manager** and handled **DNS** setup through **Route 53**, providing smooth **domain resolution**, enhanced security, and greater reliability.

## CERTIFICATIONS

---

### 1. Gradiious AWS DevOps

Jan - 2024

Successfully completed **industry deployability** training in **DevOps** at **Gradiious** Technologies, mastering AWS cloud infrastructure, CI/CD pipelines, containerization, Git, infrastructure as code (IaC), and Kubernetes. Gained hands-on experience in deploying scalable applications, managing container orchestration, and implementing efficient development workflows, positioning myself for effective contributions in modern cloud environments.

## STRENGTHS

---

- Team Work
- Multi-tasking
- Time management
- Adaptability
